Estimating Sums and Differences to the Nearest Thousands

Estimate the sum or difference by rounding each number to the nearest thousands.

1) $1,728 + 2,829 =$ _____

8) $8,535 - 7,224 =$ _____

2) $7,585 + 1,576 =$ _____

9) $4,489 + 4,931 =$ _____

3) $9,851 + 9,216 =$ _____

10) $9,274 - 4,289 =$ _____

4) $6,399 - 2,259 =$ _____

11) $6,132 + 5,676 =$ _____

5) $8,466 - 7,278 =$ _____

12) $8,798 - 3,139 =$ _____

6) $1,868 + 3,459 =$ _____

13) $3,295 - 3,133 =$ _____

7) $5,863 + 6,542 =$ _____

14) $5,629 - 2,622 =$ _____

Estimating Sums and Differences to the Nearest Thousands

Estimate the sum or difference by rounding each number to the nearest thousands.

1) $1,728 + 2,829 = \underline{5,000}$

8) $8,535 - 7,224 = \underline{2,000}$

2) $7,585 + 1,576 = \underline{10,000}$

9) $4,489 + 4,931 = \underline{9,000}$

3) $9,851 + 9,216 = \underline{19,000}$

10) $9,274 - 4,289 = \underline{5,000}$

4) $6,399 - 2,259 = \underline{4,000}$

11) $6,132 + 5,676 = \underline{12,000}$

5) $8,466 - 7,278 = \underline{1,000}$

12) $8,798 - 3,139 = \underline{6,000}$

6) $1,868 + 3,459 = \underline{5,000}$

13) $3,295 - 3,133 = \underline{0}$

7) $5,863 + 6,542 = \underline{13,000}$

14) $5,629 - 2,622 = \underline{3,000}$
