

Level 2

Data Handling

Memory Exercise

Instructions to Students:

- Look at the set of pictures for 30 seconds.
(Teachers: Ideally, show the pictures on a screen and turn it off after 30 seconds. Ensure that all pictures are visible.)
- After 30 seconds, write down all the items you can remember.

What can you remember? There are 20 items.

If you like, you can carry out a survey to see which objects were remembered the best/worst. If you collect this information, present it and describe your findings.

Check to see the items you forgot! 😊
